

TRANSITS – An Evolutionary Perspective

...with Marc Laurenson

Saturday 27 July 2019

Evolutionary astrology is based on the premise that this life is part of a continuum. That we bring in an energetic pattern from 'times before' that now needs to be healed and transformed. Transits act as sign posts guiding us on what we need to learn. We always have free choice – are we going to face our challenges, seize our opportunities or are we going to allow fear to get the better of us.

In this Workshop we will look at transits from an evolutionary viewpoint. We will discuss the growth and developmental potential of each planet transiting our chart as well as understanding a planet's past conditioning and how our former lives may resurface to be healed
